Optimized
Geometry

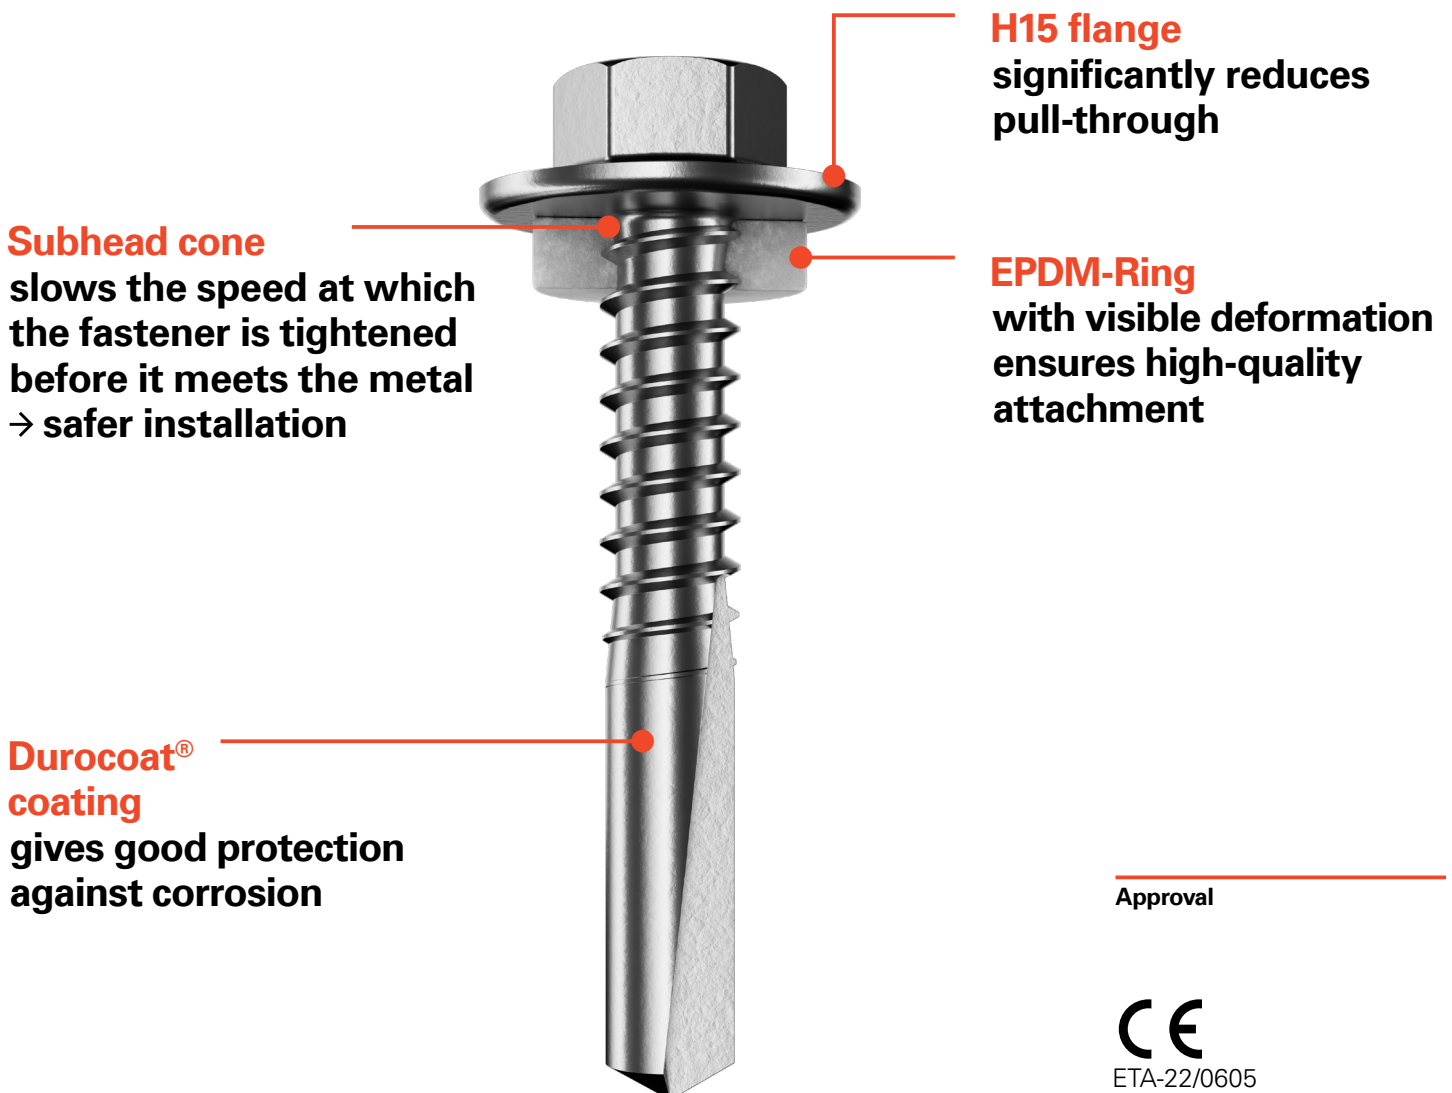

Self drilling fasteners for Cladding and Cassette Systems

The New SD-H15-E11

Optimized shear resistance

The SD-H15-E11-5.5 is a self drilling fastener ideally suited for cladding and cassette systems. The underhead cone and visible deformation of the EPDM washer substantially reduce the risk of overtightening and improve the security of attachment. The optimized geometry also provides high shear resistance. Durocoat® coating ensures excellent protection against corrosion. This unique combination gives secure and lasting mounting. Self drilling fasteners also save time and money.

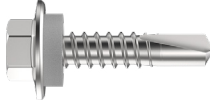

Self drilling fastener

Suitable for every type of cladding

SD6-H15-E11, Durocoat® 1000h

Carbon steel fastener for Z profiles

Product code	PU	L	CL _{met}	VD		
SD6-H15-E11-5.5×22	500	22	0-8	6	1769390	

SD14-H15-E11, Durocoat® 480h

Carbon steel fastener for T and U fittings

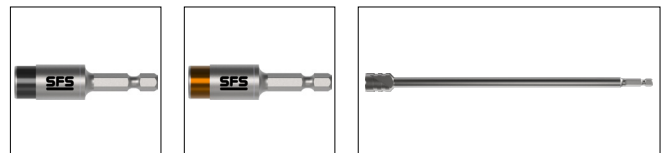

Product code	PU	L	CL _{met}	VD		
SD14-H15-E11-5.5×34	500	34	0-22	14	1769406	

SD20-H15-E11, Durocoat® 480h

Carbon steel fastener for T and U fittings

Product code	PU	L	CL _{met}	VD		
SD20-H15-E11-5.5×50	500	50	0-20	20	1769338	

CL_{met}: Clamping length, VD: max. drilling capacity

Accessories

Product code	PU	Drive	Head drive
